SUBJECT: PARTS & ACCESSORIES NOT APPROVED
BY FERRARI SpA

VEHICLES: N/A

It is coming to our attention that our vehicles are being fitted with parts and accessories of various types not approved by Ferrari SpA.

Moreover, these items are sometimes being offered by our dealers.

The integrity of our vehicles is compromised when other than genuine Ferrari or other approved parts and accessories are used because other parts and accessories have not been subject to the research, planning and experimentation regarding design and mechanical operation which our vehicles and parts undergo. The use of approved parts and accessories safeguards our image and aids in our vehicle's value being maintained and even increasing over time.

We would therefore like to remind all Ferrari Authorized Dealers that:

- We do not authorize the fitting of any parts or accessories not approved by Ferrari SpA to our vehicles.
- Ferrari refuses to accept any liability for damages or any consequences arising from the use of non-approved parts or accessories, as specified in the conditions indicated in the Owners Warranty and Service Book.

Needless to say, we cannot approve a part or accessory unless we are provided with technical specifications for the proposed part or accessory and reports of studies which prove that a proposed part or accessory meets our standards. We therefore recommend that you adhere to our guidelines.
